EDUCATION

M.A.G.I.S.T., University of California, Los Angeles (<i>Master of Applied Geospatial Information Systems and Technologies</i>)	2025
Graduate Certificate in Digital Humanities, University of California, Los Angeles	2025
GIS and Geospatial Technology Certificate, UCLA Extension	2023
B.A., Ethnomusicology, University of California, Los Angeles (<i>Senior Thesis directed by Dr. Timothy Taylor: Music Festival Participation and Memory as a Work of Art: Embodying Community Encounters and Problematizing Application of the Carnavalesque</i>)	2021
B.A., Anthropology, University of California, Los Angeles	2021

RESEARCH PAPERS

Music Festival Participation and Memory as a Work of Art: Embodying Community Encounters and Problematizing Application of the Carnavalesque (Spring 2021, Senior Thesis directed by Timothy Taylor)

“‘The Festival as the Work of Art’: Expanding Gadamer’s Comparison of the Shared Temporality of Festival and the Work of Art” (Winter 2021, final for ETHNMUS C178)

PROFESSIONAL EXPERIENCE

UCSB Library, Special Research Collections <i>Audio Digitization Technician</i>	2022 – Present
• Supervising the Henri Temianka Audio Preservation Lab and controlling traffic of audio materials to be transferred to digital by student assistants, under funding from the National Endowment for the Humanities • Creating and refining documentation for digitization procedures of audio materials, especially grooved media • Supervising imaging station where student assistants photograph disc label runoff • Utilizing Python scripts and ffmpeg to process and organize audio files, metadata, and images before pushing to project repository: adp.library.ucsb.edu • see “Audiovisual Archival Experience” and “Media Library Contributions”	

FUNDING

Audio Digitization Technician, National Endowment for the Humanities – Preservation and Access: Humanities Collections and Reference Resources, University of California, Santa Barbara: The American Discography Project / Victor and Bluebird Records Access Initiative (\$349,721), 2020–2023

Student, University of California, Los Angeles – MAGIST True Bruin Scholarship (\$3,848), 2023

[Audio Digitization Technician/Cataloger?], California Revealed, University of California, Santa Barbara: [Leon and Googie René Rhythm & Blues Collection] ([62.5pph*hr]), 2024

MEDIA LIBRARY CONTRIBUTIONS

- 1,200 hours to date dedicated to American Discography Project / Discography of American Historical Recordings digitization initiatives
 - 4,000+ unique sound recordings transferred to digital audio for public access, with considerable focus on Latin American RCA Victor releases; 4,600+ unique side labels photographed
- 62.5 hours dedicated to creating a finding aid for the Leon and Googie René Rhythm & Blues Collection

AUDIOVISUAL ARCHIVAL EXPERIENCE

- Transferring grooved media to digital audio, especially pre-war sound recordings of the 78rpm era; extensive familiarity with:
 - evolution of audio technical conventions for attenuation (EQ) curves after the advent of electrical recording in 1925
 - proprietary playback technologies including coexistence of lateral and vertical grooved records until the emergence of stereophonic recording mid-century
 - best practices for physical preservation of grooved media, especially shellac discs, in addition to wax cylinders, vinyl, and lacquer/acetate discs; familiarity with dominant contemporary solutions for cleaning discs
- Transferring magnetic media (both audio and video) to digital format, especially audiocassette, open reel tape, and VHS; familiarity with:
 - broad evolution of magnetic media history and general timeline of adoption of common formats
 - best practices for preserving magnetic tape for storage and playback, including ideal climate controlled conditions and baking operations for ‘sticky-shed’ syndrome
- Processing digitized content with software to be sent to library patrons; familiarity with:
 - ‘ffmpeg’ and various DAWs and video editors suitable for archive-quality post-processing
 - UCSB Library SRC’s metadata conventions for digitized content across several collections

GEOSPATIAL EXPERTISE

- Social and economic demographic survey data analysis
- Election statistics analysis: visualization, LISA with GeoDa
- Data visualization for survey data
- Cartographic design, especially for story-centered projects: ArcGIS StoryMaps, Leaflet, D3, Storymaps.js

RESEARCH INTERESTS

- History of popular recorded music and development of genre-specific ethos and aesthetics
- Formal, musical, and lyrical analysis of historical recordings and cross-reference with contemporary print and artistic materials
- History of major sound recording institutions and geographical development of early music industries globally: studios, broadcast stations, executive offices, venues, vendors
- History of reference mapping/GPS/navigation technology for use by everyday people

LANGUAGES

English (native); Spanish (3 years of high school and university study; spoken with family during critical language development)

COMPUTER SKILLS

Desktop GIS: ArcGIS Pro, QGIS; porting to Adobe for refined cartography or animation

Geospatial Data Analysis: GeoDa, PostgreSQL / PostGIS

Coding Languages: SQL; Python 3 (geopandas); HTML, CSS, JavaScript (Leaflet)

D.A.W.: Logic Pro X, Audacity, Renoise, Steinberg Wavelab Pro 11; ffmpeg

Adobe CC: Photoshop, Premier, Dreamweaver, Illustrator

Office: Microsoft Office; Google Office Suite; LibreOffice; FileMaker Pro; openrefine
