EDUCATION

University of California, Los Angeles

2025

Master of Applied Geospatial Information Systems and Technologies

Graduate Certificate in Digital Humanities

UCLA Extension

2023

GIS and Geospatial Technology Certificate

University of California, Los Angeles

2021

Bachelor of Arts in Ethnomusicology

Bachelor of Arts in Anthropology

WORK EXPERIENCE

Ganna Walska Lotusland

Library and Archival Collections Volunteer

05/2026 – present

- Contributing to collections cataloging efforts, including completing a folder-level inventory of Lotusland's non-living / cultural and historical collections with Catalogit

UCSB Library, Special Research Collections

Audio Digitization Technician

[12/2022 – 09/2023] [02/2024 – 03/2025] 11/2025 – present

PROJECT CONTRIBUTIONS

- Controlling traffic of 78rpm discs for the Discography of American Historical Recordings under funding from the National Endowment for the Humanities (\$349,721: 3 years)
- Keeping phases of DAHR's discographic documentation and digitization workflows "in step"
- Publishing new audio content to the project website: adp.library.ucsb.edu
- Processing materials for patron requests or specific DAHR publications, including partnership with Dust-to-Digital news.ucsb.edu/2025/022193/vast-collection...
- Created an item-level inventory for the Leon & Googie René papers: nearly one-thousand early rhythm-and-blues master recordings
- Digitized and created an inventory for the John Steinbeck SoundScriber Discs papers oac.cdlib.org/findaid/ark:/13030/kt4489q2nz

AUDIOVISUAL ARCHIVAL EXPERIENCE

- Familiarity with metadata standards used by UCSB Library SRC for digitized content across several collections and formats (use of controlled vocabularies, EAD submission to Online Archive of California)
- Translating metadata from one standard to another with Python/ODBC scripting (e.g. creating MARC catalog records from FileMaker Pro databases)
- Transferring grooved and magnetic media to digital formats
- Managing digital assets created "in-house", or ingesting foreign assets and metadata
- Developing Python scripts which use ffmpeg and ODBC to process audio files, images, and metadata into Submission Information Packages before pushing to project repositories

SUPERVISORY RESPONSIBILITIES

- Supervising student assistants in the Henri Temianka Audio Preservation Lab, Special Research Collections conservation lab and stacks
- Creating and refining documentation for file management, batch processing, and metadata remediation workflows
- Creating and refining documentation for physical handling and digitization procedures of audio materials, especially grooved media (wax cylinders, shellac and vinyl records)

COMPUTER SKILLS

OFFICE: OpenRefine, FileMaker Pro, Microsoft Office, Google Workspace, LibreOffice

LANGUAGES: Unix and pwsh/cmd CLI, Python, ODBC, SQL, JavaScript, HTML/CSS, R

SPECIALTIES: scripting/batch processing, data parsing/transformation/visualization, APIs

GEOSPATIAL DATA ANALYSIS: PostgreSQL/PostGIS, RStudio, Google Earth Engine, GeoDa

DESKTOP GIS: ArcGIS Pro & QGIS, porting to Adobe for refined cartography or animation

ADOBE CC: Dreamweaver, Photoshop, Premier, Illustrator, Bridge

D.A.W.: Logic Pro, Audacity, Renoise, Steinberg Cubase & Wavelab, ffmpeg
